PROJECTS

LifeOS Health — Full Stack Nutrition Platform | *Spring Boot · React · PostgreSQL · Gemini AI · USDA API*
github.com/rayamajhi/anirudra-droid/lifeos-fullstack

- Built full stack web app with Spring Boot REST API, React frontend, and PostgreSQL — real MVC architecture with model, repository, service, and controller layers
- Integrated USDA FoodData Central API for real-time food search across 600,000+ foods including McDonald's, Chipotle, and Starbucks — no manual nutrition entry
- Implemented Google Gemini AI to generate personalized health insights per food; engineered async processing + caching layer reducing API calls by ~80%

Health & Nutrition Tracker — Desktop App | *Java · JavaFX · OOP*

- Built a JavaFX desktop app with BMR/TDEE calculator and personalized calorie goal recommendations — applied OOP principles throughout
